

CV5G: How Viruses Are Caused By Our Abnormal Electromagnetic Environment

by Chavi Bat-baruch

Shall we let everyone die? Shall we no longer touch each other? The World Health Organization says “the coronavirus pandemic may never go away [unless] a vaccine is found.”¹ There is no guarantee you will not get the *coronavirus* after having had it once,² the vaccines have not been tested for long-term protection,³ or against ongoing mutations,⁴ and Robert F. Kennedy, Jr.'s Children's Health Defense has shown that vaccines are not adequately tested and can cause long term health problems.⁵

What is the nature of viruses? Can they be eliminated, or will coronavirus, and others, be with us forever more?

The forms and amounts of electromagnetic radiation (EMR) in our environment since the start of electric power, and its effects on biology, must be examined in order to understand the smallest life forms. *Why have there been so many viral outbreaks in the last 20 years? Why have flues been so prevalent over the last 130 years?* Electromagnetic energy is invisible, so people think it is not there, and unlike the frequencies above light (“ionizing radiation”), governments and industry do not talk about its biological effects. However, man-made, *non-ionizing*, radiation – below light – is dangerous and can be deadly.⁶ It causes a wide variety of illnesses in humans, animals, and plants.⁷ Energy charges are too small to see, but aberrant forms harm us.

Exposure standards for non-ionizing radiation are up to a quintillion (1,000,000,000,000,000,000) times higher than natural levels,⁸ and include radiation from cell phones, towers, cordless phones, wireless computers, components, internet connections and routers, satellites, and wireless devices, transmitters and antennas of all kinds, most of which operate in the *microwave* range.⁹ In 1985, two-time Nobel Prize nominee Dr. Robert O. Becker estimated the amount of radio frequency radiation (RFR) in our environment to be 100-200 million times higher than what we receive from the sun.¹⁰ That was *before* the “*wireless revolution*.” These numbers betray a grave state, and it is not only the *amount*, but the *kinds* of energy racing through the air that are dangerous: digital-pulsed, phased array, modulated, saw-tooth, low to high frequencies, are the kinds of unnatural EMR we are steeped in now due to “wireless.” We live in unnatural fields from our electric wires and appliances, too, from which we receive magnetic fields, electric, radio frequency, X-rays, and “dirty power.”¹¹ We *absorb* this radiation because we are *conductive* – we were formed by the sun's and stars' natural, *sine wave* (analog) energy. Digital, conversely, *explodes* in bursts of “data packets” at the rate of 2-6 billion per second, and is depicted as a *square* wave. It is alien, yet comprises almost all airborne energy technology now. Scientists cannot get grants to study this radiation on people because it is considered too dangerous,¹² yet it has been leveled on humanity. Any electrical item with a current running through it, even a turned-off, battery-run flashlight, emits an abnormal field and influences us.

Under the Federal Communications Commission (FCC) – the agency responsible for EMR exposure – the wireless industry is self-regulating.¹³ A revolving door exists between industry lawyers, executives, lobbyists, and FCC heads,¹⁴ and there is no doctor or biologist on staff.¹⁵ The person responsible for the current exposure standard, which recognizes the heating of tissue as the only biological effect, was a Nazi engineer, brought to the United States illegally under *Operation Paperclip*,¹⁶ and even he “consistently maintained that his dosage limit probably wasn't safe for more than an hour.”¹⁷ Arrived at in 1953, this is the standard still used today, though the Government possesses catalogues of thousands of studies showing every other kind of harm.¹⁸ Also in 1953, the kind of energy used was analog. Now, the FCC is unleashing 3-300GHz (billion cycles per second), beam-forming (maser), digital energy, for “Fifth Generation Wireless/Internet of Things” (5G/IoT), with no examination of its impact on nature. Further, there is no provision for emissions compliance oversight, and no meters available to insure the public is protected.

*The first such smart street lamp was put in place on May 14, 2019 [article], but large numbers only started being put in place in October, 2019, such that there was a furious pace of such placement in the last 2½ months of 2019. These findings show that the rapid pace of the coronavirus epidemic developed at least roughly as the number of 5G antennae became extraordinarily high. So we have this finding that China's 1st 5G smart city and smart highway is the epicenter of this epidemic and this finding that the epidemic only became rapidly more severe as the numbers of 5G antennae skyrocketed.*¹⁹

Dr. Martin Paul, Professor Emeritus, Biochemistry and
Basic Medical Science, Washington State University

In addition to the wireless industry being the default arbiter of public health and RFR, *coronavirus* is not resolved because modern medicine does not recognize some fundamental aspects about biology: cells are constituted of molecules, molecules from atoms, and atoms are energy charges, the smallest quanta of matter – and we are made of them. Doctors also do not acknowledge the flow of electricity through and between cells (cell signaling), and that this is *life*. Excess charges that enter and accrue in biology, therefore, impede normal cell functioning. Each cell contains thousands of volts of energy,²⁰ has an *electric potential*,²¹ and the closer cells are to their optimal potential, the more they are able to thwart toxins and convey immunity. It would benefit humanity if doctors made physics and the flow of electricity through cells central to clinical practice.

Modern medicine also does not acknowledge *pleomorphism*,²² and the existence of the smallest life forms: *protids*, *somatids*, or *microzymas* – little enzymes – tiny crystalline structures that exist in the cells and fluids of all living things in a normal, alkaline (homeostatic) environment. When excess sugars, chemicals, metals, or other toxins accumulate in tissue, rendering it “acidic,” the forms morph, and change, into bacteria, yeasts, fungi, and molds.²³ Researcher and author, Dr. Robert O. Young, PhD., says “my studies and research suggest that the complexes science calls viruses and retroviruses originate in the cell as microzymian principle suggests. However, they are created in response to an alarming situation (condition of disease) for the purpose of

genetic repair.”²⁴

Acidity, however, can be seen as excess energy in *material* (molecular) form, and it *alone* can cause the microzymas to morph. Excess energy entering and lodging in tissue from the outside, especially from “wireless.” can cause radio wave sickness, and other diseases,²⁵ and the energy can come from *natural* sources, too – from the sun – causing stinging, sunburn, or heat stroke; or from ionizing radiation – causing radiation poisoning symptoms.

Viruses are *spores, building blocks of bacteria (bacteriophages),²⁶ DNA repair proteins, or exosomes.²⁷* They are the tiniest life forms. Mold may appear on decaying organic matter because spores float through the air and land on it, but also because the little ferments *inside* matter evolve into micro-organisms, eating its sugars until homeostasis is again achieved.²⁸ This is the process that creates the *soil microbiome*, and is the cause of action for *Candida Albicans*, for example. Microzymas are almost impossible to kill, and can exist in dry conditions in a stable state for millions of years.²⁹ Crystals comprise a quality called “piezoelectricity,” in which energy causes movement, and movement causes the release of energy. Dr. Becker theorized that life *evolved* from crystals,³⁰ and that microzymas *are* little crystals gives credence to this theory. Dr. Young's work elucidates how flu and viruses are caused by excess energy because RNA/DNA can be seen as the first expression of energy into life, the charges that lodge in tissue transformed into spiral amino acids, the building blocks of proteins, organic matter, and DNA.³¹ When a preponderance of energy is absorbed by the crystals, they are incited to change, biochemical alterations taking place simultaneously. A mathematical model for how this is accomplished is presented in a paper entitled *5G Technology and Induction of Coronavirus in Skin Cells.³²* The authors explain that the strong energy creates holes in the liquid inside the nucleus of a cell, and the voids are filled with replications of RNA structures, which conjoin, creating strands. Further, Dr. Luc Montagnier, Nobel Laureate for his discovery of the *AIDS* virus, has shown DNA is formed by energy in the presence of water.³³ Viruses are “repair proteins” because they are a mechanism for carrying the excess energy out of the body – a protective mechanism, or *waste product*. In an environment unsullied by electropollution, like Earth before electricity, the illness would run its course by finding no more susceptible hosts.

This is how electricity from the outside causes a virus – the endemic microzymas absorb charges, which form RNA/DNA. Thus, a novel form of electricity causes a new *strain of virus*. The 5G/IoT radiation made a never-before seen virus because of the never-before seen form and amount of electricity, as it deposits 100-1000 times more energy into the air, creating densification. “Influenza” was correctly named because people understood the intermittent diseases were *influenced* by the stars – appearing during solar storms.³⁴ The first inexplicable, intractable flu disease from *man-made* radiation was the “Spanish Flu” of 1918, caused by the first widespread use of wireless radios during WWI.³⁵

1st, 2nd, 3rd, 4th, and 5th generation wireless (900MHz, modulated 1.8GHz, pulsed modulated 2.4GHz, and now phased array pulsed modulated 3-300GHz), each caused a

new virus (SARS, Swine flu, MERS, Seasonal flu, COVID³⁶), as have successively introduced electricity forms since power.³⁷

- ✓ *The coronavirus in the US is not the same strain that left China,*³⁸
- ✓ *SARS II is a morphed SARS I,*³⁹ *and it continues to mutate,*⁴⁰
- ✓ *SARS II is distinguished from the previous strains by something having been “inserted,” (changed), in the laboratory.*⁴¹

A clearer light can be shed on these statements if they are seen through the lens of *pleomorphism* and *charges*. Collimated, coherent 2.5-4.9 billion bursts of radiation per second, and 24.75-27.5, or 37-42.5GHz modulated *garbage* – the radiation for 5G in Wuhan,⁴² and similar types around the world – fit the bill of a new electricity configuration and intensity causing a new morphed cell-fragment disease. It takes *time* for genetic adaptations to occur in response to environmental changes without death and disease, otherwise there is too much, too soon. The *repair proteins* turned virulent, are over-powered energy balls, emitting signals like so many tiny antennas, and this may explain why some *corona* symptoms are similar to radio wave sickness – the body is filled with billions of tiny energy transmitters. Artificial, non-ionizing radiation has been shown to compromise immunity,⁴³ break DNA,⁴⁴ and change bacteria, blood, and other cells.⁴⁵ Millimeter-sized waves (those for 5G) are so small they are nearing the frequencies of heat and light, and the size of cells. People falling over in the streets from *corona* were asphyxiated, and the blood-oxygen deprivation symptoms seen⁴⁶ could be caused by the blood cell *rouleaux* effect observed after wireless exposure.⁴⁷ The *corona surge* of July 2020,⁴⁸ and continuing outbreaks and mutations, are from the unabated 5G roll-out.

The first flu pandemic from man-made radiation was in 1889 from electric power lines,⁴⁹ and a new era of disease epidemics began 100 years later, when personal electricity-broadcast devices (beepers and cell phones), and the base stations that connect them, appeared. This is when radio wave densification began in earnest in our immediate environment, and when *HIV/AIDS* appeared. Since the advent of digital cell phones and towers in the late 1990s, which has led to the nearly 5 billion cell phones⁵⁰ and estimated 20-30 billion wireless consumer devices⁵¹ today in use around the world, the occurrence and incidence rate of novel and intractable viruses and diseases has skyrocketed⁵² in lockstep with the radiation increase. The 5G/IoT grid, in which everything, including baby diapers,⁵³ contains transmitting antennas, and which includes tens of thousands of satellites under the ionosphere irradiating planet Earth⁵⁴ will immerse us in so much radiation, experts and prominent scientists believe we will not survive.^{55,56}

The lesson is to stop artificial RFR. Occasional flu outbreaks from solar flares may still occur,⁵⁷ but will be fewer and farther between, and may disappear completely if we re-forest the planet, reestablishing the original ecology, and shield our electric wires. Dr. Young says “*when the fish is sick, change the water.*”⁵⁸

Energy charges are the building blocks of biology and matter,⁵⁹ and we swim in too many. We need to halt the increase, and revert back to a hard-wired world. We must go back to the original electromagnetic environment with which we evolved, and to pre-1996 levels of EMR right away.

We do not want thousands more to perish because we do not want to admit our on-demand gadgets are destructive, and we do not want to inject ourselves with substances of unknown consequence. We can implement faster, safer, clearer, cheaper, and more secure communications through hard wires,⁶⁰ or we can irradiate ourselves to extinction. We can choose unlimited profit for corporations, or look at the true nature of biology. A new paradigm, incorporating pleomorphism and electromagnetics in biology, and installing shielded, hard-wired and glass-fiber cables, and *phone booths* so people can *plug in* when out, must be adopted if we are to end off-charts death and disease.

“Covid-19 cases per million are 95% higher and covid-19 deaths per million are 126% higher in states with 5G,” writes Dr. Magda Havas, Professor at Trent University School of the Environment, in her study comparing COVID cases and deaths in States with and without 5G.⁶¹

The antennas in Wuhan were turned on before, *not after*, the coronavirus outbreak. IoT/5G radiation has not been safety tested,⁶² If we open our eyes to the invisible elephant in the room, it is possible that the entire *coronavirus* disaster will disappear at the click of the off switch. Government should tell people the truth about the biological effects of man-made radiation, and stop subverting health to corporate greed. We can have cell phones, or a virus-free world, not both.

After her use of a cell phone – when towers began to mushroom all over the landscape-- for almost 20 years the author was forced into the forests, deserts, and mountains as an "electro-refugee," living in conditions unfit for human habitation. She scoured the country for years in search of a place where she was able to obtain a night's sleep and was not tortured by cell phone and other broadcast tower radiation. Finding relative stability and safety in the forest, she lived in one general area in a tiny trailer with no facilities, and endured and overcame numerous illnesses due to the difficult conditions. Undergoing the harrowing experience of poisoning from a friend's three-minute cordless phone call – the radiation from which penetrated through walls and over 60 feet to where she was seated outside – she grounded herself over the ensuing days and weeks in order to discharge the overload of accumulated energy to save her life. She continued to heal by going within to understand the true nature of biology at the atomic level. While remaining disabled by electropollution, she advocates for the elimination of the invisible toxin that is artificial electromagnetic radiation, from society, nature and the planet.
