

I received the below vax cure from an actor who was forced to get 2 shots to keep his job, but knew they were horrific and immediately went to work on getting them out. He swears his blood is clean now. I reached out to him with some questions for which I never received a response. My questions are in all caps below (and some of the words may be misspelled). These are the things I still don't know, but the basics are there and I believe following the basics of this protocol will put you light years ahead in terms of removing the toxins, poisons and nano tech you were injected with...

ACTOR'S VAX CURE

On an empty stomach in the morning, take...

Nanokinese - Take 6000 IUs

Then take 1000 IUs of niacin

Approx. an hour little later, take fermented beet root with corsicum, NAC (N-acetylsystine), magnesium (HOW MUCH OF EACH APPROX?)

In evening just take niacin

HOW MUCH APPROX?

An hour later quercetin, NAC and bromelain - it unfolds the spike protein - dissolves it.

HOW MUCH OF IT SHOULD THEY TAKE?

Natokinese eats spike protein and blood clots.

Pectasol - grapefruit pectin - nano sized zeolite - must be nano

HOW MUCH SHOULD THEY TAKE AND WHEN?

White Pine Needles

shikimic acid

suramin cures autism and antidote for vaccine

Bulgaria can get it - must rename it in injectable form

B 17 and B4

niacine

3 types of magnesium

IS THERE ANY PRESCRIPTIVE AMOUNT AND/OR
TIMING FOR ALL OF THESE?
